Personal Statement

I am a motivated individual with a passion for technology and learning new things. I have just finished studying with Mission Ready HQ in the Advanced Software Development Accelerator and have previously graduated from the Southern Institute of Technology with a Bachelor of Information Technology. Through these courses I have developed skills in programming and web and mobile application development and deployment.

I am committed to building a career in the IT industry and really enjoy that through code I can create something tangible that is of value to people. I am diligent, responsible, have a high attention to detail and I work well as part of a team or by myself.

Skills

Technology

- Java, C#, React-JS, Web Deployment
- Flutter and Dart, Android Deployment
